

Solving Two-Step Inequalities

CA Standards
AF 1.1
AF 4.1

Goal: Solve two-step inequalities.

EXAMPLE 1 Solving and Graphing a Two-Step Inequality

Remember that solving multi-step inequalities uses many of the same steps as solving multi-step equations.

$$13 + 5n \geq -22$$

Original inequality

$$13 + 5n \boxed{-13} \geq -22 \boxed{-13}$$

Subtract 13 from each side.

$$5n \geq -35$$

Simplify.

$$\frac{5n}{5} \geq \frac{-35}{5}$$

Divide each side by 5.

$$n \geq -7$$

Simplify.

EXAMPLE 2 Combining Like Terms

$$6x - 4 < -2x$$

Original inequality

$$6x - 4 \boxed{-6x} < -2x \boxed{-6x}$$

Subtract 6x from each side.

(Subtraction property of inequality)

$$\cancel{4x} - 4 < \cancel{4x} - 2x$$

Combine like terms.

$$\frac{-4}{-8} > \frac{-2x}{-8}$$

Divide each side by **-8** and **reverse**

the inequality symbol.

(Division property of inequality)

$$\frac{1}{2} > x$$

Simplify.

Guided Practice Solve the inequality.

1. $-9p - 17 \leq -62$ 	2. $10a - 21 > 4a + 15$
--	---

EXAMPLE 3 Multiple Choice Practice

Video Games You are saving money to buy a video game system. You have saved \$30. You earn \$32 each week babysitting. You pay \$7 each week for piano lessons. For how many weeks must you save your money to have at least \$205?

- (A) $w \leq 7$ (B) $w \geq 7$ (C) $w \leq 9.4$ (D) $w \geq 9.4$

Solution

To find the number of weeks you must save your money to have at least \$205, subtract your expenses from your earnings. Let w represent the number of weeks.

Earnings

Lesson Expenses

Savings

$$30 + 32w - 7w \geq 205$$

Write an inequality.

$$30 + 25w \geq 205$$

Combine like terms.

$$25w \geq 175$$

Subtract 30 from each side.

$$w > 7$$

Divide each side by 25.

Answer: The correct answer is **B**. (A) (B) (C) (D)
